

# Greenfleet

## ***Up & Up Creative Pty Ltd***

***This is to certify that Up & Up Creative Pty Ltd has purchased a Greenfleet future offset to sequester greenhouse gas.***

Greenfleet will plant 123 native trees\* to establish a biodiverse forest and offset 32.86 tonnes of greenhouse gas generated by Up & Up Creative Pty Ltd from June 2012 to May 2013.

As well as offsetting greenhouse gas, this action is helping to improve water quality, reduce soil degradation and provide essential habitat for native species.

Sept 2012

\*This number of trees is a reasonable estimate of the number of trees required to be initially planted to sequester the total quantity of carbon purchased and takes into account that not all trees initially planted will survive due to the natural survival rate of trees. Accordingly, trees that do not survive following initial plantation may not necessarily be replanted.  
Greenfleet's commitment to recapture carbon on behalf of our supporters involves the management of native forests across all our planting sites. Greenfleet's forest pool is forecast to meet its overall carbon commitments to supporters.
